# Semsonex Industrial Hoses

## Re-inforced PVC Hose

Semsonex reinforced PVC hoses have proper and adequate re-inforcement in form of Three layers : PVC inner and outer layers, middle mesh reinforced layer made of double - wound polyester.

### Characteristics

- Unique formula of polyester reinforced PVC makes Pneumics products far exceed other similar products in corrosion resistance, aging -resistance, abrasion and resilience.
- > High flexibility, can easily be wound and unwound at the temperature ranging from -10° to 65°

Polyester Reinforcement

Light weight, good pressure - resistance, can provide products of different burst pressures upon request.

#### Application

- > Apply for suction and delivery of water for various application.
- > It is also used to transport other fluids and gases in agriculture and construction industry
